

Petrochemical Transportation Engineering Company (P.T.E.C.) was established in 1992, focusing on logistics services for petrochemical factories.

PTEC has fulfilled industrial growing needs as long as domestic economic development plans. We have provided a large number of logistics services for customers by our personnel knowledge, experience, expertise and also using modern equipment.

Having required permits from official and legal references such as Road Maintenance and Transportation Organization and Ministry of Labor and Social Affairs, allowed us to set up branches in important Iranian industrial zones and select sophisticated delegates in target countries for export. This helps us to complete raw material and products supply chain.

Our services have expanded before, during and after production processes based on inbound and outbound logistics. They consist of transport logistics (road, railway, maritime and air), warehousing, customs clearance and port operation. Moreover, they are completed by project logistics, trans loading and transshipment, value added services, logistics consultancy, electronic (e) logistics and eventually are maximized by door to door production/integrated logistics.

PTEC has tried to allocate some special tasks to the technical affiliated companies to reach higher efficiency. The companies are: Sahel Gostar Pars in port operation, Jahan Deniz Kala in maritime transport, Emtedad Zanjireh Paydar in international road transport and Terminals and Tanks Petrochemical Company (T.T.P.C.) in petrochemical products vessels and their export terminals.

Also, based on legal frameworks, PTEC has entered Tehran Stock Exchange by "HEPETRO" symbol since 2003 to disclose the financial activities which lead us to more fair competition and better future for our business.

Petrochemical Transportation Engineering Co.

Informational Brochure

Certificates, Permits and Memberships

Integrated management system certificate (ISO 9001:2015, ISO14001:2015, ISO 45001:2018)
HSE-MS certificate
